SUMMARY

First-year Computer Science student with experience building responsive web applications using React, Next.js, JavaScript, and TypeScript. Passionate about frontend development, UI/UX, and creating scalable user interfaces. Actively strengthening problem-solving skills through Data Structures and Algorithms.

EDUCATION

Indian Institute of Information Technology Manipur

Bachelor of Technology in Computer Science Engineering

Sep 2025 – Jun 2029

Imphal, Manipur

RELEVANT COURSEWORK

- Data Structures
- Engineering Mathematics
- Engineering Physics
- Electrical Circuits
- Programming in C, C++
- Object-Oriented Programming

TECHNICAL SKILLS

Languages: C, C++, JavaScript, TypeScript, Python

Frontend: HTML, CSS, Tailwind CSS, React, Next.js

Concepts: Data Structures, Algorithms, Object-Oriented Programming, Responsive Design

Tools: Git, GitHub, VS Code, LocalStorage

PROJECTS

Developer Portfolio Website | *Next.js, TypeScript, Tailwind CSS* | [GitHub](#) | [Live](#)

- Built and deployed a personal portfolio website using Next.js and TypeScript to showcase projects, achievements, and technical skills
- Implemented responsive layouts and reusable UI components using Tailwind CSS
- Designed a modern user interface with dedicated sections for projects, coding profiles, and achievements
- Focused on performance, accessibility, and mobile-first design principles

Student Dashboard UI | *React.js, JavaScript* | [GitHub](#) | [Live](#)

- Developed a responsive academic dashboard interface focused on clean and scalable frontend design
- Built reusable React components to improve maintainability and component reusability
- Implemented responsive layouts for seamless experience across desktop and mobile devices
- Applied modern UI design principles and component-based development practices

DSA Progress Tracker | *React.js, JavaScript* | [GitHub](#) | [Live](#)

- Developed a React-based web application to track Data Structures and Algorithms practice progress
- Implemented search and filtering features for efficient navigation across curated coding problems
- Built an interactive dashboard to visualize solved problem statistics and user progress
- Implemented localStorage persistence to maintain user progress across sessions
- Designed reusable components and implemented multi-page routing for scalable frontend architecture

ACHIEVEMENTS

1st Place – Code Ronin (College Tech Fest): Developed a fall detection application for visually impaired individuals using a quantum-inspired probabilistic machine learning model

Collaborated in a 24-hour hackathon to design and develop an assistive technology solution for visually impaired individuals

CODING PROFILES

LeetCode: Solved 190+ Data Structures and Algorithms problems leetcode.com/u/witty_kitty_11

CodeChef: Active competitive programmer and coding contest participant codechef.com/users/witty_kitty_11
